## MICRONEEDLING WITH PRP (aka "The Vampire Facelift")

Platelet-Rich Plasma, or PRP is obtained by drawing a small amount of blood from your arm into a sterile tube. This sample is centrifuged to separate your plasma, which we use for the treatment, from your red and white blood cells. Plasma contains high concentration of platelets, stem cells and growth factors which can promote hair, skin cell and collagen growth.

### What are the benefits of microneedling with PRP?

When PRP is used with microneedling, it penetrates your skin through the tiny channels the microneedles create. The PRP supercharges the microneedling benefits. PRP also addresses under-eye puffiness and dark circles to give you a more youthful, well-rested appearance. Since PRP is derived from your own blood, the side effects are virtually eliminated.

Call [661-617-6101](tel:661-617-6101) to schedule an appointment or a complimentary consultation to see if platelet-rich plasma is right for you.
